

Ruslan Zub

Backend-Focused .NET Developer
Software Engineering Student at NTU “KhPI”

zubruslan51@gmail.com • github.com/ReedSnake • +380682386262

PROFILE

Second-year Software Engineering student focused on backend development, scalable systems, authentication workflows, and maintainable application architecture. Experience building applications using ASP.NET Core, EF Core, MySQL, JWT authentication, REST APIs, and Dockerized development environments. Interested in scalable backend systems, distributed architecture, and clean engineering practices.

TECHNICAL SKILLS

Category	Technologies
Backend	.NET, ASP.NET Core, EF Core, REST APIs, JWT Authentication
Database	MySQL
Infrastructure	Docker, Git
Frontend/Desktop	JavaScript, WPF

PROJECTS

Edemly

Multi-tenant educational platform built with ASP.NET Core and EF Core.

ASP.NET Core • EF Core • JWT Authentication • REST APIs • Docker • Multi-tenant Architecture

NSO: Broken Reality

Real-time browser multiplayer card game with lobby synchronization and game state management.

multiplayer synchronization • lobby systems • game state management • team sprint development

SmartTravelPlanner

Desktop route-planning application developed with WPF and .NET.

WPF • shortest-path algorithms • desktop UI • local persistence

EDUCATION

NTU “KhPI” — B.Sc. Software Engineering (2024 – Present)

INTERESTS

Backend architecture • scalable systems • authentication workflows • distributed systems
